Summary

Passionate and versatile professional with a strong foundation in data science, artificial intelligence, and Python-based development, complemented by experience across software development and technical internships. Skilled in data analysis, problem-solving, and building efficient, scalable solutions. Highly motivated to apply data-driven and AI-powered approaches, alongside DevOps practices, to deliver impactful insights, continuously learn, and grow as a Data Scientist and AI focused professional.

Education

University of Education

Bachelor of Science in Computer Science (2022-2026)

Township Campus, Lahore

Punjab Group of Colleges

Intermediate in Computer Science (2020-2022)

Campus 3, Lahore

Technical Skills

- Programming Languages: Python, C++
- Assembly Programming: Proficient in COAL language and 8086 microprocessor emulation
- Web Development: HTML, CSS, Django, PHP, JavaScript
- Web Scraping: Selenium
- Database Management: SQL, NoSQL
- Cloud Computing: Azure, AWS, Digital Ocean
- DevOps Tools: Containerization, Docker
- Version Control: Git, GitHub
- Operating Systems: Ubuntu, Windows, Debian
- Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn
- Networking: Basic networking and troubleshooting skills

Industry Experience

- **Artificial Intelligence – 2026**

Completed a Samsung sponsored training program at Knowledge Stream Institute, gaining practical knowledge of Artificial Intelligence. Participated in a research paper project, applying analytical and research skills to real-world AI challenges.

- **Punjab Police Trainee – 2025**

During this internship, I gained hands-on exposure to police operations and departmental workflows. I visited their reputed training centers, participated in practical exercises designed for police personnel, and learned about the organizational environment, protocols, and overall working practices.

- **Data Science & AI Internee – 2024**

Gained hands-on experience with Django, Django REST Framework, API development, and cloud deployment on DigitalOcean. Worked on LangChain, chatbots, web scraping, RAG systems, and LLM deployment, applying practical DevOps practices.

- **Cloud & IT Specialist Trainee – 2024**

Gained hands-on experience in cloud deployment, Azure, Docker, and containerization. Learned OS differences, version control, shell scripting, and cloud service models (SaaS, PaaS, IaaS), building foundational DevOps skills.

- **Logistics & Operations Experience – 2023**

Coordinated daily logistics as a dispatcher, efficiently matching truck drivers with optimal loads to maximize earnings and operational efficiency. Developed strong communication and negotiation skills while liaising with clients and drivers to ensure timely and smooth operations.

Certifications

- Artificial Intelligence - knowledge streams (Samsung)
- Azure Fundamentals (AZ-900)
- IT Specialist - Cloud Computing (CertNexus)
- Data Science Career Path (Microsoft Learn)
- Foundation of Project Management - [Coursera](#) (Google)
- Google AI Essentials - [Coursera](#) (Google)
- Google Prompting Essentials - [Coursera](#) (Google)
- Google Agile Essentials - [Coursera](#) (Google)
- Foundation of User Experience (UX) Design - [Coursera](#) (Google)

Achievements

- Participated in RACSIT 2024 – AI-focused academic event at University of Education.
- Microsoft Learn – Completed over 10 badges related to data science and cloud computing.
